

NimBus

the new solution for public
transportation tracking

- **Free Wialon-based solution**
- **User-friendly interface**
- **Intuitive navigation**
- **Flexible configuration and ACL system**
- **API for third party system integrations**

Combined functionality

Tracking system features

Combined functionality of the core Wialon modules in a handy interface:

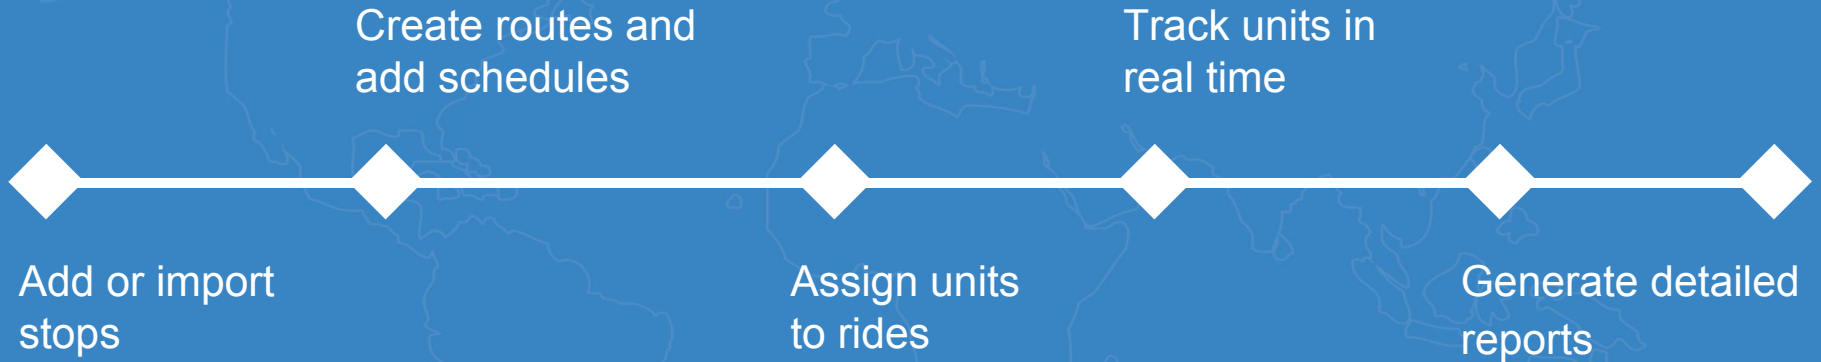

- Geofences as waypoints
- Geofence visiting control
- Flexible checkpoint order configuration
- Schedule management
- Unit bindings and distribution
- Automatic or manual ride creation
- Address search
- Event-based notifications
- Detailed reporting
- Real-time tracking on the map with scaling features and handy navigation

Specialized tools

Features developed with due consideration to dispatcher job specifics:

- Handy timeline for online tracking
- Business-specific reports
- Waypoints of any shape to improve tracking on the most complicated junctions
- Search and filtration by vehicle types
- Operation patterns to create individual working schedules for each route
- Color identification of late/early arrivals
- Reports in terms of routes and units
- Special ACL system
- Detailed description of routes and stops to identify the ones of various directions

How it works?

Getting started with NimBus

- ◆ Add the new app from the library
- ◆ Authorize in NimBus
- ◆ Activate “Depot” for one of your lower-level accounts
- ◆ Continue working under the sub-account
- ◆ Success!

The screenshot shows the NimBus web interface. At the top, there is a navigation bar with the NimBus logo, a menu with 'ACTIVATION' (highlighted with a red box), 'ADMINISTRATION', and a user profile 'NimA'. Below the navigation bar, the page title is 'Activation'. The main content area displays a tree view of accounts and their depot status. The tree structure is as follows:

- Nim1
 - Nim1a
 - Nim1aA
 - Nim1b
 - Nim1c
 - Nim2
 - Nim2a
 - Nim3

Each account has a corresponding depot status and a toggle switch:

Account	Depot Status	Toggle
Nim1	No depot	Off
Nim1a	Depot activated	On
Nim1aA	No depot	Off
Nim1b	Depot suspended	Off
Nim1c	Depot activated	On
Nim2	Depot activated	On
Nim2a	No depot	Off
Nim3	No depot	Off

Depot administration

Manage user ACL

Grant users access rights to manage depots, stops, routes, rides, and online tracking.

Create and edit route groups

Restrict the list of routes available to users to advance organizational management.

A faint, light blue outline of a world map is visible in the background of the slide, centered behind the main text.

Let's have a closer look at NimBus and its advantages

Stops

Create or import stops

Create and edit waypoints of any shape in a few clicks or select their location in address search field

Import stops from KML/KMZ files

Specify transport vehicle type for advanced filtration and search in the list and on the map

Identify stops not involved in routes

Quick access to stops on the map from the list

The screenshot shows the NIMBUS application interface. At the top, there is a navigation bar with the NIMBUS logo and user information (George Noname, DEPOT N8). Below the navigation bar, there are filters for transport vehicle types: All (90), Bus (5), Trolleybus (5), Tram (10), Route taxi (10), and None (60). The main area is divided into a list of stops on the left and a map on the right. The list of stops includes:

- 1 Franklin Park Rd Eastward (12 routes)
- 300 Longwood Ave (43 routes)
- 580 Mt Auburn St, Cambridge Westward (57 routes)
- 175 Forest St, Waltham Southward (8 routes)
- Monument Sq, Charlestown Westward (21 routes)
- 760 Fellsway, Medford Eastward (0 routes)
- 565 Squire Rd, Revere Center (7 routes)

A pop-up window titled "This stop is involved in routes" is displayed over the map, showing the following routes:

- Bus routes**
 - 123 580 Mt Auburn St, Cambridge - 1 Franklin Park Rd
 - 55 300 Longwood Ave - 580 Mt Auburn St, Cambridge
- Trolleybus routes**
 - 33 175 Forest St, Waltham - Monument Sq, Charlestown
 - 365 760 Fellsway, Medford - 565 Squire Rd, Revere
 - 123 Longwood Ave - 580 Mt Auburn St, Cambridge

Another pop-up window titled "This stop is not involved in any known routes" is displayed over the map, indicating that a specific stop is not associated with any routes.

Routes

Manage routes

Generate routes with precise schedules, individual operation patterns and bound units

Add hundreds of schedules for various circumstances and create schedules on the basis of the existing ones

Assign the units constantly following the route on the specified schedule in advance

Use dynamic search and filtration by vehicle type, route number, name, etc.

Change stops sequence by drag&drop or replace one stop by another

Rides

Plan rides

Automatically create rides based on the schedules and operation patterns of active routes

View planned rides for any date and manage rides within the following week

Use dynamic search and filtration to identify rides with no units assigned

Plan rides for schedules going beyond 24 hours

Group rides by a route/unit for more convenient data display

Operation patterns

The screenshot shows the Nimbuz software interface. At the top, there is a navigation bar with the Nimbuz logo and menu items: STOPS, ROUTES, RIDES, ONLINE, REPORTS, and a user profile icon labeled 'NimB2'. Below the navigation bar is a 'Patterns' section with a search bar and a calendar icon. The main content area displays four operation patterns:

- 1. Weekends and holidays**

Days of the week	Season	Excluding	Including
Sa,Su	-	-	07.11.2017, 25.12.2017, 01.01.2018, 02.01.201...
- 2. Vacation season**

Days of the week	Season	Excluding	Including
All	1 May - 29 October	-	-
- 3. Summer**

Days of the week	Season	Excluding	Including
All	1 June - 31 August	-	-
- 4. School year**

Days of the week	Season	Excluding	Including
Mo, Tu, We, Th, Fr	1 September - 31 May	30.10.2017, 31.10.2017, 01.11.2017, 02.11.201...	-

Create custom activity schemes for each route

Operation patterns are directly connected with schedules and determine the days when the latter should be active (weekdays, seasons, roadworks periods, etc.).

Online tracking

Control rides in real time

Use handy timeline and notifications to control late/early arrivals, deviations from the route, etc.

Employ 1 of 3 GIS sources for unit tracking on the map

Make use of color identification when analyzing late/early arrivals and view tooltips for additional information

Replace a vehicle on the already started ride

Configure settings for late/early arrivals detection

The screenshot displays the NIMBUS online tracking interface. At the top, there are navigation tabs for STOPS, ROUTES, RIDES, ONLINE, and REPORTS, along with a user profile for George Noname. Below the navigation, there are filters for vehicle types: All (3), Bus (2), Trolleybus (0), Tram (1), Route taxi (0), and None (0). A search bar is also present.

The main content area shows three bus routes, each with a timeline of stops and real-time status updates:

- Route 113:** 550 Arsenal St., Watertown - 9 Hope Ave, Waltham. A tooltip indicates a detour through the bridge. The timeline shows stops 1 through 11. Status updates include +5 min at stop 2, +3 min at stop 5, and +2 min at stop 23.
- Route 132A:** 5 Country Club Rd, Woburn - 2 North St, Stoneham. The timeline shows stops 1 through 11. Status updates include -4 min at stop 2, +6 min at stop 5, -33 min at stop 7, and -22 min at stop 8.
- Route 104A:** 195 Summer St, Lynnfield - 105 S Main St, Middleton. The timeline shows stops 1 through 17. Status updates include +6 min at stop 5, -1 min at stop 11, and -4 min at stop 15.

A tooltip for the GM Scenicruiser PD4501-771 is shown, listing the vehicle name, model, and time range (06:00 - 06:43). Other vehicles listed in the tooltip include GM Silversides (-2 min), GM Scenicruiser (+3 min), Neoplan, Le Mirage or Prevost (-3 min), Setra S407 CC, and BCI Falcon 45 Coach (+7 min).

Reports

Analyze the performance of your fleet

Study ride history and assess performance quality in terms of routes and units

Generate basic and detailed reports

Execute reports for the intervals of up to 100 days

Export reports in .xlsx

For owners and managers

- ◆ Create an effective dispatch center for comprehensive control
- ◆ Cut mileage, fuel and maintenance expenses by eliminating unauthorized trips
- ◆ Avoid fines for violating schedules
- ◆ Optimize the number of vehicles on route by minimizing idle time
- ◆ Get quick access to analytics for decision making

For dispatchers

- ◆ Ensure schedule compliance, proper vehicle distribution, and reliability of services
- ◆ Minimize traffic disruption cases
- ◆ Improve planning accuracy, driver discipline and passenger transportation quality
- ◆ Optimize time for route planning, schedule management and route sheets creation
- ◆ Replace vehicles on the already started rides in case of breakdowns

Enjoy a complete solution

Use advanced Wialon functionality to create a
comprehensive passenger transportation
management solution
